**DETAILED ACTION**

Receipt is acknowledged of the Remarks filed 22 December 2003.

***Terminal Disclaimer***

The terminal disclaimer filed on 22 December 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. applications 09/800,234 and 09/746,242 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Allowable Subject Matter***

Claims 1 and 3-7 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance: The best prior art of record discloses a cathode-ray tube comprising a focus mask having first conductive strands and second conductive wires oriented perpendicular to the first conductive strands, wherein an insulating material, made of a low porosity lead-zinc-borosilicate glass powder, separates the first conductive strands from the second conductive wires. However, the prior art of record fails to teach or fairly suggest a focus mask in a cathode ray tube having an insulating means made of lead-zinc-borosilicate glass powder having a median particle size less than about 1 $\mu$ m as required by claim 1. Claims 3-7 are allowable by virtue of their dependence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
